SENIOR PRODUCT LEADER

Product Strategy | Business Growth | Operating Scale | Strategic Partnerships

EXECUTIVE PROFILE

Senior product leader skilled at turning complex business challenges and market inputs into actionable product strategies, scalable operating practices, and growth opportunities. Proven expertise in conducting strategic portfolio analysis, proposing high-impact initiatives, building strategic partner ecosystems, and aligning product direction with executive priorities. Recognized for pioneering AI-driven backlog governance, structuring data-backed prioritization frameworks, and scaling cross-functional teams across fintech, banking, and SaaS environments.

LEADERSHIP & EXPERTISE

- Strategic Initiative Planning
- Product & Portfolio Analysis
- AI & Process Automation
- Executive Alignment
- Customer & Market Intelligence
- Platform Growth Strategy
- Cross-Functional Leadership
- Backlog & Portfolio Prioritization
- Strategic Partner Ecosystems

PROFESSIONAL EXPERIENCE

AKUVO (Vista Equity Partners Portfolio)

SVP, Product & Partner Strategy — **2026 – Present**

Expanded scope to lead strategic partnership development, portfolio growth, and enterprise-wide product backlog mechanics. Established automated prioritization systems to gather market demand, inform executive product decisions, and align platform strategy with long-term business priorities.

- **AI-Driven Backlog & Intake Architecture:** Built an automated customer demand intake and RICE scoring engine from the ground up using Copilot Studio, Power Automate, and Azure DevOps. Deployed AI agents to triage, groom, and score incoming ideas, achieving ~70% immediate AI-driven triage and scoring upon submission without manual discovery delays. Transformed the process from 30 days to manually triage and score down to zero-touch instant processing, clearing the manual triage queue from 315 items to 37, expanding the scored backlog from 107 to 447 actionable ideas in 5 months, and saving ~1,000+ resource hours annually.
- **Market-Driven Portfolio Prioritization:** Scaled customer idea repository to hold over 1,250 ideas with 11,400+ customer votes and 920+ comments (82% customer-submitted). Established a data-backed scoring rubric measuring reach against benchmarked development effort, resulting in a 30% conversion rate from customer demand to shipped or planned roadmap features.
- **Investment & Roadmap Alignment:** Designed a comprehensive 6-part investment category framework (Customer Value, Revenue Impact, Contractual Commitments, Architecture, Organizational Efficiency, Security & Compliance) to allocate roadmap capacity against business intent rather than volume.
- **Strategic Initiative Framing & Discovery:** Conducted deep customer and market research to define scope, objectives, and execution briefs for 30 strategic initiatives across platform layers. Successfully drove 14 major initiatives onto the product roadmap.
- **Partner Ecosystem & Integration Delivery:** Served as named product stakeholder for 31 high-priority delivery items, representing 872+ hours of completed delivery. Architected and expanded key integrations across core banking systems, digital payment providers, automated communication tools, insurance tracking, legal/compliance workflows, remarketing platforms, among other key product enhancements. Managed roadmap items carrying direct Revenue Impact classifications (50% of all revenue-labeled work in the plan).
- **Executive Decision Support & Analytics:** Built custom Power BI dashboards and DAX measures to provide executive leadership and product teams with real-time pipeline visibility and data-driven market insights.

SVP, Product Management
2023 – 2026

Led product operations, built the Business Analyst organization, and spearheaded major customer-facing digital self-service initiatives to strengthen execution alignment between business goals and engineering delivery.

- **Product Operations & Team Scaling:** Built, scaled, and managed the Business Analyst organization, achieving 200% team growth. Introduced AI tooling into authoring, prototyping, and design workflows to elevate output quality and establish standardized requirements, design, and handoff documentation practices.
- **Customer Self-Service Infrastructure:** Conceptualized, built, and deployed enterprise Knowledge Base, scaling it to 300+ articles serving ~4,700 users at a 95% search effectiveness rate.
- **Customer Engagement & Governance:** Launched and scaled the Customer Idea Community to over 1,200 submitted ideas across 800+ active users. Established and led Customer Product Council, a 9-member customer-investor advisory forum that remains an active part of core product governance.

Vice President of Product Management
2020 – 2023

Instituted foundational product practices, execution discipline, and early customer adoption strategies during AKUVO's initial scaling phase.

- **Founding Product Leadership:** Served as a founding member of AKUVO, actively participating in all foundational product design, strategic choices, and core development decisions.
- **Early Customer Advisory & Onboarding:** Acted in a dual product advisory and implementation role for AKUVO's first 20 enterprise clients, securing high adoption rates and tight product-market fit.

TEMENOS USA

Team Lead & Senior Product Evangelist
2015 – 2020

- Led North American go-to-market evangelism and RFP operations. Partnered closely with Product Management on roadmap strategy while driving strategic customer acquisition and sales conversions.

AKCELERANT (Acquired by Temenos)

Product Evangelist & Customer Care Specialist
2009 – 2015

- Drove product demonstration strategies and executive deal support across core lending platforms. Built client enablement, technical support, and onboarding capabilities.

EDUCATION

Bachelor of Business Administration (B.B.A.)
Immaculata University
